

# LOW-CLOG Radiators

## For Feed Lot & Off-Road Applications

There is a growing demand for the older trucks with Low-Clog, feedlot style core for Ag and offroad applications. Feed lots and silage grinding operations dot the landscape across the United States. Our In-Line, flat fin design and wide spacing allows for minimal clogging and easy cleanout, while the reinforced construction provides superior strength and resistance to extreme environments e.g. Mining & Oil Fields. Dimpled tubes give them extra capacity for on-highway cooling as well. Everything needed for installation is in the box: Gasket, CAC rubber isolation mounts and nuts as applicable. No need to buy parts separately.

- Low Clog Design, Easily Cleaned & Maintained
- 5 Row Copper Brass Core & Dimpled Tubes for Additional Cooling Power
- Open Air Flow Flat Fins - 8 Fins Per Square Inch
- Best quality HD+ is Unequaled for Cooling, Extended Life and Durability
- Can be used for Cross Country Long Hauls
- Fully Puddled Reinforced Headers and Hemmed Fins
- All Metal Bolt Together Radiator
- Zinc Treated Steel Surge & Core Tanks for Extended Corrosion Resistance
- Durable Powder-Coat Finish
